

Jenkins

Jenkins Training – Delivered by Jenkins Experts

Continuous integration (CI) and continuous delivery (CD) are fundamental best practices of modern software development and Jenkins is the number one open source platform used for CI and CD, worldwide. Jenkins can greatly enhance the development, test, stage and build process, accelerating software delivery and minimizing delays caused by lack of visibility.

Master Jenkins and Accelerate Your Team's Development Process

The *Mastering Continuous Integration with Jenkins* course is taught by Jenkins experts from select CloudBees Ecosystem Partners. Instructors have extensive knowledge about the use of Jenkins throughout the software delivery process.

You will learn how to set up and optimize an effective Jenkins environment that will reduce integration issues and improve code quality. You will also discover how Jenkins can act as a communications hub for your development team.

Available course offerings are:

- >> **Two-day course**, classroom setting
- >> **On-site training**, available by special arrangement

The courses are modular, flexible and highly interactive, with extensive hands-on examples. Students will walk away with a solid understanding of how to implement a Jenkins CI environment, including:

SETTING UP
a production-grade
Jenkins instance

INTEGRATING
Jenkins with
other tools

ADMINISTERING
Jenkins instances

LEARNING ABOUT
enterprise functionality
to enhance Jenkins

This course is recommended for: Beginner and intermediate Java developers, software architects, technical project managers, build managers and QA engineers.
